

AGILE ROLES

OBJECTIVES

To understand the roles people take in an Agile Project

Stakeholder

Project manager

Product Owner

Business Analyst

Scrum Master

Development Team

THE STAKEHOLDER

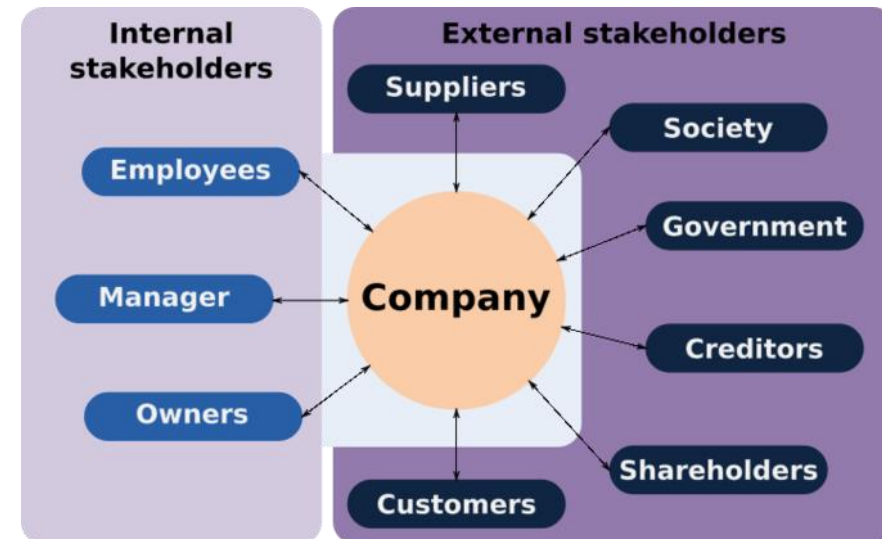

A stakeholder is anyone with an interest in or an influence on the product.

Should be contactable by the development team to help them to understand what is required.

They should attend the Sprint review meeting

PRODUCT OWNER

PO is the sole person responsible for managing the product backlog (list of features to be worked on).

They communicate with the stakeholders to ensure requires are added to the product backlog

They attend the Sprint planning meeting and Sprint review meeting

MORE ABOUT THE PRODUCT OWNER

1. DEFINING THE
VISION

2. PRODUCT BACKLOG
MANAGEMENT

3. PRIORITIZING NEEDS

4. OVERSEEING
DEVELOPMENT STAGES

5. ANTICIPATING
CLIENT NEEDS

7. EVALUATING
PRODUCT PROGRESS
AT EACH ITERATION

PROJECT MANAGER

Manage projects and will overview expenses.

Try to reduce risk on the project.

Can also manage more than one project at a time.

BUSINESS ANALYST (BA)

Supports the product owner by gathering requirements and providing guidance on what to build.

They usually work across many products.

SCRUM MASTER (SM)

Helps those outside the scrum team understand which interactions are beneficial.

Help find techniques with effective Product Goal definition and Product Backlog management

Supports the development team by removing impediments, facilitating meetings and coaching self-organisation

Attends the Sprint planning, Daily stand up, Sprint review and the Sprint Retrospective meetings

FOSTERING COMMUNICATION
Creating channels and translating lingo

PROTECTING THE TEAM
Act as a buffer for disruptive PMs and Management

TOOL MAINTENANCE
Jira administration

REPORTING
Creating burndown charts, velocity, etc.

SCRUM MASTER

MEETING FACILITATION
Standups, retros, sprint planning, etc

AGILE COACHING
1 on 1 and at the organizational level

TEAM SUPPORT
From settling disagreements to coffee runs

REMOVE BLOCKERS
Superhero time

DEVELOPMENT TEAM

A multi-disciplinary development team usually consists of software architects, designers, programmers and testers.

This is a self organising team.
They decide how to tackle the items in the sprint backlog.

People with other skillsets can be added to the team when required.

Attend the Sprint planning, Daily stand up,
Sprint review and the Sprint Retrospective meetings

REVIEW

You now understand the following roles within an Agile project

- Stakeholder
- Project manager
